

Kvaser DB9-Power Inlet

EAN: 73-30130-00973-8

Kvaser DB9-Power Inlet is a power injector for CAN busses from a DC power jack into one female D-SUB9 connector. The Kvaser DB9-Power Inlet also has one unpowered male D-SUB9 connector for connecting to the CAN network. The Kvaser DB9-Power Inlet provides a simple and safe way to supply Kvaser interfaces on a development board, as well as powering interface devices without internal power, such as Kvaser's Blackbird and Memorator series.

### Major Features

- Acts as a power injector with one female and one non-connected male D-SUB9 connector
- Connects to power supply using a standard 2.0 mm DC power connector.
- A complementary 12 V, 1 A power supply is included

## Kvaser DB9-Power Inlet

### TECHNICAL DATA - KVASER DB9-POWER INLET

RELEASE DATE	18/9/2018
PRODUCT GROUPS	Accessory
WEIGHT (G)	100.0
LISTPRICE:SEK	400.00
